

Mouzan Raza

GenAI Developer

ContactMe | E-Mail | LinkedIn | Github | Portfolio

Computer Science student (CGPA 3.80/4.00) with real work experience as an ML Engineer and Backend Developer. Skilled in building ML pipelines, NLP systems, RAG applications, and REST APIs. Passionate about Generative AI and building practical, production-ready AI solutions.

EXPERIENCE

Machine Learning Engineer

WebTech.dev Software House · Vehari

Dec 2025 – Feb 2026

Built end-to-end ML pipelines (data cleaning !' feature engineering !' for client projects using Scikit-learn, XGBoost, and GradientBoosting

Developed NLP solutions for text classification and sentiment analysis using HuggingFace Transformers; exposed models via FastAPI REST endpoints.

Performed EDA and delivered data visualization reports using Pandas, Matplotlib, and Seaborn to inform business decisions.

Backend Developer

ZA Coder · Burewala

Jan 2025 – Dec 2025

Designed and maintained REST APIs in FastAPI with Pydantic validation and role-based access control (RBAC).

Wrote complex SQL queries (joins, CTEs, window functions) in SQL; containerized services with Docker and automated CI/CD via GitHub Actions.

EDUCATION

B.Sc. Computer Science (BSCS)

Govt College University Faisalabad (GCUF) · 6th Semester

CGPA: 3.80 / 4.00

PROJECTS

RAG-Based Document Q&A System Github | Live Demo

Built a full RAG pipeline with document chunking, vector search, hybrid retrieval, re-ranking, and LLM answer generation with source attribution using LangChain , FAISS , FastAPI , Ollama , Gemini

AI Resume ATS Score Checker Github | Live Demo

NLP tool that scores resume–job description match and generates LLM-powered, role-specific

improvement suggestions using NLP , Google Gemini , Streamlit

Fake News Detection System Github | Live Demo

Built a text classification system to detect fake vs real news using TF-IDF and full NLP pipeline covering preprocessing, feature extraction, model training, and evaluation with 99% accuracy using NLP · TFIDFvectorizer · Scikit-learn , Streamlit.

SKILLS

AI / ML: Python, Scikit-learn, TensorFlow, XGBoost, HuggingFace, LangGraph, CrewAI, RAG, Prompt Engineering, Fine-Tuning (LoRA)

Backend: FastAPI, SQL, REST APIs, Docker, GitHub Actions

Data: Pandas, NumPy, Matplotlib, Seaborn, FAISS, Chroma, Pinecone

Tools: Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Google Colab
